Banner University Medical Center Tucson

CAREGIVER SUPPORT GROUP

Are you caring for someone who is waiting for a transplant or has already received one?

Supporting a family member or friend on the transplant journey comes with challenges: accompanying them to appointments, helping when they are sick, providing moral support and worrying whether they are okay... while still needing to manage your own life and responsibilities. Life can become very stressful.

Attend this group to receive and offer support to others on this path, to share stories, ideas and laughter.

Please join us virtually on Teams each Monday from 3-4pm
